

Swayam Pendgaonkar

Software Engineer

+91 8793314454 | Swayam.pendgaonkar@gmail.com | github.com/starrylight90 | linkedin.com/in/Swayam Pendgaonkar

Software Engineer with production experience building and optimizing backend, cloud, mobile, and AI/LLM-powered systems at enterprise scale. Track record of measurable performance, reliability, and cost improvements across Java, Python, FastAPI, RAG pipelines, and Flutter systems.

SKILLS

Languages: Java, Python, C++, C, TypeScript, Dart

Backend: Node.js, FastAPI, PHP, MongoDB, MySQL, REST APIs, Microservices

Frontend: React.js, React Native, Flutter, JavaScript, HTML, CSS, Three.js

Cloud & DevOps: Kubernetes, Docker, AWS, Azure, GCP, Git, GitHub Actions, CI/CD

Practices: Unit Testing, Performance Optimization, Agile Methodologies

AI & Data: RAG Pipelines, Vector Indexing, LLM Cost Optimization, Prompt Engineering

EXPERIENCE

A.P. Moller – Maersk | Bangalore, India

Jul 2025 – Present

Associate Software Engineer

- Designed and shipped a critical backend module processing 1M+ data records/run, supporting multi-country logistics operations; now a core part of daily operations.
- Optimized a high-frequency SQL query from 52ms to 0.35ms (150x improvement), reducing database load on a core operational workflow.
- Increased automated test coverage from 0% to ~80% across multiple repositories, improving reliability and reducing regression risk.
- Rewrote data parser architecture from device to cloud, improving data availability from 90% to 98%.
- Migrated legacy Java 11 systems to Java 21 and containerized services with FastAPI, Docker, and Kubernetes, cutting deployment time by 60% and downtime by 99.9%.
- Owned real-time incident handling and production issue resolution across backend and mobile layers, reducing alert volume by 40% through proactive patching.
- Improved Flutter mobile app performance: cold start time down 40%, DAU up 18%, recovering key revenue-driving user flows.

Science to People | Boston, USA

Jun 2025 – Jun 2026

Technical Project Manager (Part-Time, Remote, Nonprofit)

- Contributed to development of a high-volume Retrieval-Augmented Generation (RAG) AI diagnostic system on Google Cloud Platform (GCP), building secure retrieval, vector indexing, and hybrid prompting pipelines that processed millions of records/month with LLM-based inference.

Project Human City (PHC) | Toronto, Canada (Remote)

May 2023 – May 2025

Intern → Development Manager → CTO

- Built org-wide CI/CD pipeline with GitHub Actions; PR pass rate >90%, delivery time improved 30%.
- Shipped 3 full-stack platforms and 4 microservices powering real-time sustainability dashboards and reporting tools.

EDUCATION

Symbiosis Institute of Technology, Pune

Oct 2021 – Jun 2025

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.67

CERTIFICATIONS

Java (HackerRank) | Microsoft: Python & OpenCV | **Google Machine Learning** | IBM Cloud Development

LEADERSHIP & RECOGNITION

- Shadowed Global CTO, A.P. Moller Maersk (Jun 2025) — only intern chosen to shadow the global CTO.
- Global Immersion Program, TUHH Germany (Apr 2023) — 1 of 2 students selected from the entire college.
